

# Introducing the eCardio Academic Web Platform

Academic medical centers have unique needs that are not met by traditional monitoring services. To address this, eCardio developed the first offering designed to meet the demands of university-delivered care.

eCardio's unique Academic Web Platform maps the workflow and requirements of teaching hospitals and is designed to improve efficiency and strengthen teaching programs.

The eCardio Academic Web Platform offers:

- **A fully digital solution.** The Academic Web Platform eliminates the paper shuffle associated with traditional studies. Studies are routed electronically and automated reminders are generated when studies are not reviewed in a timely manner.
- **EMR Integration** for compatibility with ITS initiatives.
- **Automated referral letters.** The Academic Web Platform automatically generates referral letters to link the hospital with referring physicians.
- **Rapid response.** Urgent notifications are posted to the web site within fifteen minutes of the patient transmission.

For more information about eCardio's Academic Web Platform for your institution, please contact us at 1-888-747-1442 or [academicmedicine@ecardio.com](mailto:academicmedicine@ecardio.com).
